# Handy Stool

Created by Arup - Stephen Philips

"For Handy, I wanted to create a refined, sculptural shape, with a lightweight and dynamic feel using a single material for the structure. Above all, I wanted Handy to be a likable product—one that's easy for people to use in a range of environments."

**Steven Philips, Arup Group**

## Fresh & Impromptu Connections

Handy is an essential design, brilliantly executed—a stool so refreshingly and stunningly useful, it could only be called Handy. Featuring a sturdy shape and signature opening for easy storage and movement, Handy fits right into buzzing offices, college classrooms, and more.

## Stands Out, Stacks Up

You can stack up multiple Handy Stools to save space, and they'll still retain their pleasing aesthetic. Packed with color and material customization options, Handy encourages fresh and impromptu connection and brings a lively spirit to any collaborative space.

“You can also tuck your bag underneath Handy, keeping your possessions safe and your space tidy. Handy is suited for many spaces and perfectly suited for many users.”

**Steven Philips, Arup Group**

## A Smart Little Stool

Handy Stool looks friendly and approachable, but it's also packed with science and engineering. Arup engineers carried out a dynamic structural analysis to determine how the shape would perform when people sit on and move within the seat. Handy Stool's built-in versatility makes it a fitting addition to a café, brainstorming space, private office, or lounge—basically anywhere. Even in hotels, shops, and homes, Handy Stool delivers everyday functionality, all because of a few insight-driven features.
